

BAI2 Statement

Message Implementation Guide

Version 1.2

BAI2 Customer Statement Message

BAI2 is a file format for performing electronic cash management balance reporting. The BAI2 format is used to provide end of day and intraday account information from a bank to a customer's TMS or ERP environment. It is used to transmit detailed and/or summary information about entries debited or credited to the account.

The purpose of this guide is to provide customers with detailed specifications on the BAI2 message format from HSBC to support the development of an appropriate interface and reconciliation routine with their TMS/ERP system. Any data content specific format required is beyond the scope of this specification.

Portions of this message implementation guide are extracted from the Cash Management Balance Reporting Specification Version 2 – <u>Technical Reference Manual</u> published by Bank Administration Institute. This guide should be read in conjunction with the above publication which will provide details of some of the BAI specific terminology used in this guide.

BAI2 Message Generation Timing

The BAI2 messages are usually produced between 00:00 and 07:00 local time. Generation times depend on volume of transactions so the generation time will vary from day to day.

BAI2 Account Consolidation Reporting

HSBC supports consolidated balancing reporting. Customers can either consolidated the balancing reporting into a single BAI2 file via customise account grouping or country & Institution code. The consolidated BAI2 file can either have a single or multiple 01 header records reporting (refer to Appendix A).

1. BAI2 File layout structure

Each BAI2 file has the following records:

Record type	Mandatory / Optional*	Default Value	Description
01	M	File Header	Identifies the beginning of a file. This is configurable. Customer can opt to have single or multiple 01 records per file for consolidated account reporting.
02	M	Group Header	Identifies a group of accounts that belongs to the same country and institution code for the same day.
			For examples, i) Accounts in SG with the same date will be group into 2 ie. SG/HBAP and SG/HBOS.
			ii) Accounts from SG/HBAP with 2 different dates to be reported will be group into 2 separate groups.
03	М	Account Identifier and Summary Status	Identifies account number and reports activity summary and account status information
16	0	Transaction Detail	Provides the detail transaction information
88	0	Continuation	Identifies records continue to use the next line for data for any type of record
49	М	Account trailer	Identifies the end of account record and provides account control totals
98	М	Group trailer	Identifies the end of a group record
99	M	File Trailer	Identifies the end of a file

Each BAI2 file may contain several groups if customer opts for consolidation reporting. For Account level reporting, each BAI2 file will only contain 1 group and 1 account within the group for each file.

_

^{*} The 'Mandatory/ Optional' column is incorporated for information only according to the BAI2 specification.

BAI2 reporting file structure layout with a single 01 header record and multiple 02 Group records.

2. BAI2 Record Formats

01 Record: File Header Format

The file header marks the beginning of the BAI2 file.

Field Name	Mandatory/	Default Value	Description
	Optional*		
Record Code	M	'01'	
Sender ID	М	022000020	Configurable by customer during the reporting setup. If the data is not provided, it will be defaulted to HSBC US ABA - 022000020.
Receiver ID	M		If the receiver ID is not known at the time of the reporting configuration, the default 18 characters Customer ID will be used. Example of Customer ID:
			SGHBAPGSG141000000
File Creation Date	М		YYMMDD format, file creation date UK time.
File Creation Time	М		HHMM format (2400), file creation time in UK time.
File ID	M		Defaults to 1 as a standard for previous day reporting.
			For interim same day reporting, the file ID will start from 1 and increment by 1 for each subsequent interim reporting. It will be reset to 1 at the beginning of each day.
Physical Record Length	0	'80'	As the bank is using variable record length (up to 80 bytes per line), the max value of 80 will be populated.
Block Size	0	'1'	
Version Number	M	'2'	
End of Record	М	<i>'</i> /'	

Example:

01,022000020,SGHBAPGSG141000000,120913,1906,1,80,1,2/

02 Record : Group Header Format:

The group header reports the account(s) that are from the same originator and same as-of-date and as-of-time.

Field Name	Mandatory/ Optional	Default Value	Description
Record Code	M	'02'	
Ultimate Receiver ID	0		Same as Receiver ID in 01 record.
Originator ID	M		The ABA number is only valid for US and GB accounts. The SWIFT address should

^{*} The 'Mandatory/ Optional' column is incorporated for information only according to the BAI2 specification.

PUBLIC

			be used for those institutions without ABA numbers.
Group Status	M	'1'	'1' for Update
As-of-Date	М	Work of Date	YYMMDD format, transaction date for each
As-of-Time	0	ш	statement day or balance as-of-date HHMM format (2400). This is reported only for interim same day reporting. The time zone used will be based on the time zone setup in the overall reporting profile.
Currency Code	0	σ	Not formatted as accounts with different currency may be grouped together, the currency code is formatted in account header
As-of-Date Modifier	0		'2' for Final previous-day data '3' for Interim same-day data
End of Record	М	<i>'</i> /'	

Example for final previous day:

02,SGHBAPGSG141000000,HSBCSGSG,1,120913,,,2/

Example for interim same day:

02,USHBUSUS12345678,021001088,1,111020,1100,,3/

03 Record : Account Identifier and Summary Status Format

The Account identifier and Summary Status record identifies the account number mad report status and summary information.

Field Name	Mandatory/ Optional	Default Value	Description
Record Code	M	'03'	
Customer Account Number	М		Internal account number, without '-'
Currency Code	0		Account currency code in ISO standard
Type Code	0		Refer to the list of code used below.
Amount	0		Expressed without a decimal. The account currency code will determine the implied decimal. Status amounts are negative if applicable. Summary amounts may be negative or unsigned. Maximum may have 18 digits without leading zero.
Item Count	0	"	Default is unknown
Funds Type	0	67	Not used
End of Record	М	'1'	

BAI Type code used by the bank in the 03 record.

Record Code	Type Code	BAI2 Description	End of day BAI2	Intraday BAI2
03	010	Opening Ledger	Υ	Υ
88	015	Closing Ledger	Υ	N
88	030	Current Ledger	N	Υ
88	040	Opening Available	Υ	Υ
88	045	Closing Available	Υ	N
88	060	Current Available	N	Υ
88	063	Total Float	Υ	Υ
88	072	1-Day Float	Υ	Υ

88	074	2 or More Days Float	Υ	Υ
88	075	3 or More Days Float	Υ	Υ
88	100	Total Credits	Υ	Υ
88	102	No of Credits	Υ	Υ
88	400	Total Debits	Υ	Υ
88	402	No of Debits	Υ	Υ

Example:

03,260093320000,USD,010,5525116638,,/
88,015,6105839257,,,040,5524958738,,,045,6105681357,,/
88,063,0,,,072,0,,,074,0,,/
88,075,0,,,100,784117150,,,,102,,18,/
88,400,203394531,,,402,,63,/

16 Record: Transaction Detail Format

The transaction Detail reports transaction detail with the accompanying text and referenced numbers.

Field Name	Mandatory/ Optional	Default Value	Description
Record Code	M	'16'	
		10	I don't first has to make a detail data. Defends the
Type Code	M		Identify the type of detail data. Refer to the
			Transaction code listing for the type of
Area			codes used by the bank in Appendix B.
Amount	0		Always positive (unsigned). Expressed
			without a decimal. The account currency
			code from the account record will
Fords Toron		()	determine the implied decimal.
Funds Type	0		The Space default will be used when the
			value date, posting date and reporting date
			are the same.
			The funds type of "\/" will be used if these
			The funds type of "V" will be used if these
			dates differ. If funds type = "V", the next two fields are value date and value time.
			Both are the originator's business date and time zone. The value date is the date the
			originator makes funds available to the Customer. The value time field will remain
			blank.
Bank Reference	0		Bank Reference Number assigned by the
Number			bank to help identify the transaction.
Namber			If not available, NONREF will be displayed.
Customer Reference	0		Customer Reference Number.
Number			Customer Reference Number.
Tamboi			If not available, NONREF will be displayed.
— ,			0
Text	0		Statement transaction description (1 st line
			of the additional narratives), other lines will
Fiel (Decemb		()	be formatted to the '88' record.
End of Record	M	<i>'I'</i>	The '/' is not used when the last entry in
			the record contains a text description.

Example:

16,108,1626338,,SGS130920UNJ7JB4,S0622570890001,POWER CONVERSION

88 Record: Continuation Format

Record 88 is a continuation record. If the data in any type of record exceed the physical record size, or if dividing the record is desirable for any other reason, an 88 record allows the data to continue in the same format. The continuation is labeled as a type 88 record. A Continuation (88) record may follow any type of record, including another Continuation (88).

Field Name	Mandatory/ Optional	Default Value	Description
Record Code	M	'88'	
(Next Field)	M		The format is the same as in the preceding record. If the '88' record follows a '03' record, then the format is as in the sample above. The '88' record only follows a '16' record if there is more than one line of 'Statement Transaction Description'. Only the additional lines are shown in the '88' record. See the sample below.
End of Record	М	<i>'J'</i>	The '/' is not used when the last entry in the record contains a text description.

If the text field in record 16 cause it to exceed the 80 bytes limit, the text field will be wrapped and then continue to an 88 record.

Example:

16,108,1626338,,SGS130920UNJ7JB4,S0622570890001,POWER CONVERSION PRAVITE LIMITE 88.D

49 Record : Account Trailer Format

The account trailer record provides account level control totals.

Field Name	Mandatory/ Optional	Default Value	Description
Record Code	М	'49'	
Account Control Total	M		Algebraic sum of all amount fields in 03, 16 and 88 (after 03 record) records. This field includes the "-" sign if the resulting total is negative. If no sign precedes the total, the default is positive.
Number of Records	M		The total number of records in this account including 03, 16, 88 and 49 records. This field is padded with zeroes to make up to7 digits number, 9999999
End of Record	М	<i>'</i> /'	

Example:

49,25236619352,0000179/

98 Record : Group Trailer Format

The Group Trailer record provides group level control totals.

Field Name	Mandatory/ Optional	Default Value	Description
Record Code	M	'98'	
Group Control Total	М		Algebraic sum of all account control totals in this group. This field includes the sign "+" or "-" for the total. If no sign precedes the total, the default is positive.
Number of Accounts	M		Number of 03 records in this group. This field is padded with zeroes to make up to 7 digits number, 9999999
Number of Records	М		The total number of all records in this group including 02, 03, 16, 88, 49 and 98 records. This field is padded with zeroes to make up to 7 digits number, 9999999
End of Record	M	<i>'/'</i>	

Example:

98,25236619352,0000001,0000181/

99 Record : File Trailer Format

The File Trailer record provides file control totals.

Field Name	Mandatory/ Optional	Default Value	Description
Record Code	M	'99'	
File Control Total	М		Algebraic sum of all group control totals in this file. This field includes the sign "+" or "-" for the total. If no sign precedes the total, the default is positive.
Number of Groups	М		Number of 02 records in this file. This field is padded with zeroes to make up to 4 digits number, 9999
Number of Records	М		The total number of all records in this file including 01, 02, 03, 16, 88, 49, 98 and 99 records. This field is padded with zeroes to make up to 7 digits number, 9999999
End of Record	М	<i>'l'</i>	

Example:

99,25236619352,0001,0000183/

Appendix A: BAI2 Examples

Scenario: Customer X (customer ID - SGHBAPGSG99999999) has 2 accounts setup for BAI2 balance reporting, 260999999999 (SG domicile account) and 160999999998 (HK domicile account).

Account level BAI2 report

Statement reporting for SG account 260999999999 for statement date 13-Sept-2012
